Start

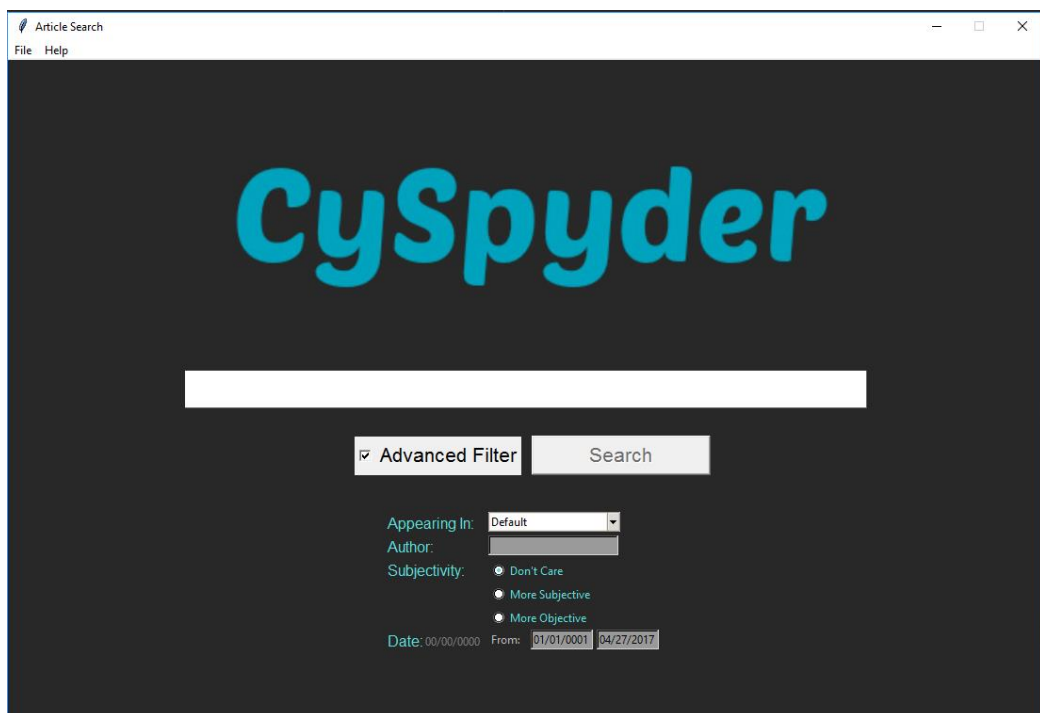

Initial start window with New Session or the option to select a previous Search and restore the results along with File and Help menus.

New Session window

Advanced Filters for Searching selected.

Results page:

The screenshot displays the 'Article Search' application window. The interface is divided into three main sections. On the left, there is a sidebar with two sections: 'Key Article Subjects' and 'Most Mentioned Phrases in Results'. The 'Key Article Subjects' section contains a link 'Click on an article to see more info'. The 'Most Mentioned Phrases in Results' section lists several phrases with their respective counts: '(203): Microsoft', '(150): Windows', '(77): IE', '(67): Adobe', and '(46): Office'. The main area of the window is titled 'Results by Title' and lists 20 search results, all of which are related to Microsoft security updates and vulnerabilities. At the bottom of the sidebar, there are three buttons: 'New Search', 'Edit Search', and 'Save Search'.

List of results from search listed by their title. Key article subjects from search response and most mentioned phrases.

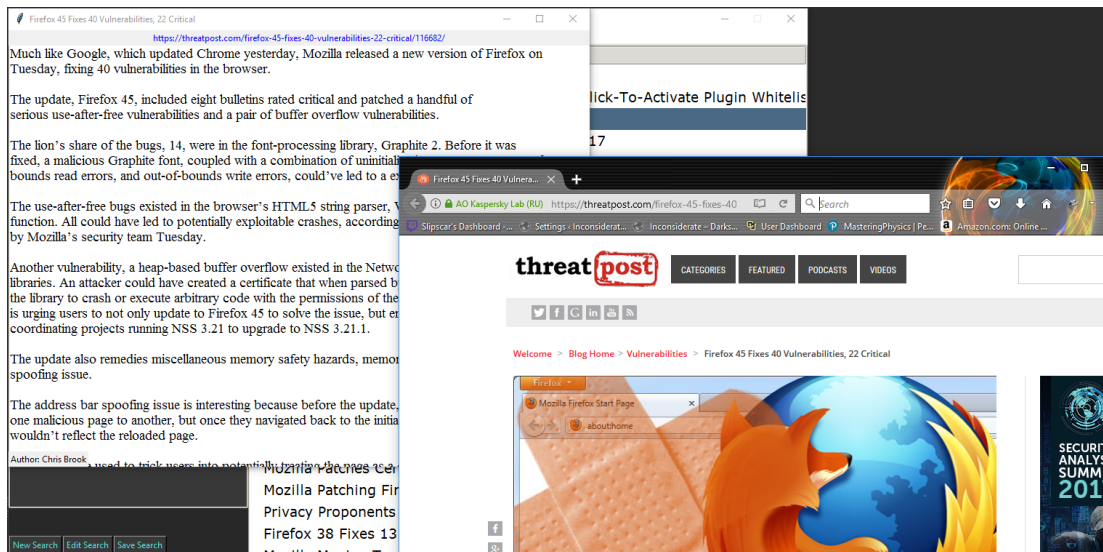

Selecting a result will populate the Key Article Subjects window.

The screenshot shows the 'Article Search' application window. On the left, there are two panels: 'Key Article Subjects' and 'Most Mentioned Phrases in Results'. The 'Key Article Subjects' panel lists: *Lookout, *Microsoft, *EMS, *Microsoft Enterprise Client, and *Mobility Group. The 'Most Mentioned Phrases in Results' panel lists: *(203): Microsoft, *(150): Windows, *(77): IE, *(67): Adobe, and *(46): Office. The main area on the right, titled 'Results by Title', displays a list of search results. The top result, 'Microsoft, Lookout Team Up In Mobile Security', is highlighted. Below it are several other results related to Microsoft security updates and patches. At the bottom of the left sidebar, there are buttons for 'New Search', 'Edit Search', and 'Save Search'.

Double-Click of a result will open the article to read. Title of the article with a hyperlink are located at the top along with the author and the date that the article was published at the bottom of the window.

This screenshot shows the same 'Article Search' application, but with the article 'Microsoft, Lookout Team Up In Mobile Security' open in a new window. The article's title and a hyperlink are displayed at the top of the new window. The main content area shows the beginning of the article, which discusses Microsoft's partnership with Lookout, a mobile security company. The article mentions that the integration of Lookout's Enterprise Mobility Suite (EMS) with Microsoft's Lookout is aimed at combining efforts to thwart mobile threats and protect data across users, devices, and applications. It also quotes Brad Anderson, CEO of Microsoft's Enterprise Client & Mobility Group, and Lookout CEO Jim Dolce. At the bottom of the article window, the author is listed as 'Dark Reading Staff' and the date published is 'June, 07, 2016'. The background shows the same search results and sidebar as the previous screenshot.

Clicking on the Hyperlink will open the link in the default os browser.

Save Search will open a Sessions File and create a folder for the date if it does not exist. The search results can then be saved to the file by the name of choice.
